

Ophthalmic Medical Technician

What do they do?

An Ophthalmic Medical Technician works with an ophthalmologist to help patients with eye disorders. They obtain patient medical histories, give diagnostic tests, provide instructions on glasses and contact lenses, give eye medicine and maintain optical equipment.

With additional training, ophthalmic technologists can also assist in more advanced procedures.

Where do they work?

Most Ophthalmic Medical Technicians work in ophthalmologist offices, hospitals, clinics, outpatient centers and surgical centers.

Pay:

According to the U.S. Bureau of Labor Statistics, the average yearly income for Ophthalmic Medical Technicians is \$38,220.

Education:

To become an Ophthalmic Medical Technician a high school diploma or GED is required. Though not required, there are technical programs available for Ophthalmic training and certification.

Ophthalmic Medical Technician training in WI:

Madison Area Technical College: www.madisoncollege.edu

Madison College offers an ophthalmic clinical assistant program. This program is an expanded curriculum from an optometric technician program and students work under the supervision of an ophthalmologist.

High School Students interested in becoming an Ophthalmic Medical Technician should take classes in science, art, computer programming and math.

Accreditation:

Ophthalmic Medical Technician programs are accredited by the Commission on Accreditation of Ophthalmic Medical Programs.

www.coa-omp.org

The Consortium of Ophthalmic Training Programs is a non-profit organization of accredited training programs designed to promote the growth of ophthalmic training programs and awareness of ophthalmic medical personnel.
